

E-Dental Solutions

Address: 2504 E. River Rd.

Phone: (520) 745-5496

Website: www.edentalsolutions.net

When you walk into Dr. Elahe Wissinger's lobby, you will be warmly welcomed and the last thing you will think of is a dentist office. From the crystal chandelier to the bubbling fountain waterfall to the hint of vanilla in the air, everything about your experience at E-Dental Solutions is relaxing.

Dr. Wissinger—who did her undergraduate work in psychology—says she strives to make her office warm and inviting to help people relax when they are in her care, and therefore have a more pleasant experience.

Dr. Wissinger takes pride in having the most state-of-the-art dental technology available today. She and her staff are continuously updating their knowledge and skills taking dental courses all over the country. She hires only the most talented and knowledgeable staff who are as passionate about dentistry as she is. Please feel free to call her office and one of her caring staff members can educate you about some of the wonderful technologies she offers. Invisalign invisible braces, in office Zoom2 tooth whitening, Lumineers (a painless and noninvasive option to traditional veneers to get the smile you have always wanted), laser procedures, single visit crown extractions, cosmetic bonding, bridges and partials.

Dr. Wissinger wants her patients to have a smile they are proud of, but it's not all about your smile, she says "I like to treat the whole person—not just the teeth. I love the way we can positively change someone's attitude and confidence when they have the smile they have always wanted."
